

## Products

### **tsuite**

Manage your contacts, categorize them by groups, and deliver mobile marketing campaigns and messages to friends, clients, and colleagues on over more than 500 global wireless networks. Manage calendar information, and centralize your wireless communication management by importing calendar and contact entries from virtually any management system.

### **tsuite MZ**

Got an itch to give your mobile phone an edge? Turn your mobile handset into a video game or music jukebox. Customize your ringtones and logos, and personalize your mobile screens by uploading your own pictures directly to your phone. tsuite MZ allows you to download ring-tones and logos, and play mobile games against other mobile users.

### **tsuite INFUSE**

Need to integrate your existing applications or websites with mobile communication? In a few minutes, you can seamlessly empower your on-the-road sales force, colleagues, clients and business prospects with SMS notifications and alerts, directly from your existing websites, or applications. Maintain permission-based marketing campaigns, and access statistics on business prospects and leads. Contact our sales department for more information.

### **eScratchpad**

Simplify and organize by creating lists that can be sorted, prioritized, and accessed from home, office, or anywhere in the world. Use as a stand-alone product or integrate it with your tsuite calendar.
